A DESIGNER'S PERSPECTIVE

"For the active family with three high school students, the kitchen is the hub of family life. It's where they gather for meals and snacks, where the children spread out and do homework, and where they entertain friends and family. So, I turned a once drab kitchen into an elegant space featuring beautifully contrasting wood cabinetry, custom-designed crystal chandeliers, hand-glazed tile mosaic backsplash, and floating island where folks can casually gather to enjoy food, wine and each other."
